Introducing the New University of Southern California Laser Check Stock

The new University Payroll check stock contains the latest security protection features designed and created solely for USC use. The secure check stock incorporates copy-protection, anti-counterfeit measures, and fraud deterrents. Any attempts to alter the new check stock will be visually apparent. You can be assured that a check printed on the new check stock is authentic, unaltered, and protected against attempts to counterfeit or tamper with it.

For further details contact Payroll Services or your Home Department Coordinator.
